We are launching into the
unknown...

Scholarly Hub is taking flight. We would like to congratulate and commend your participation in your child's education and being open to alternative strategies and methods to engage your child back towards love of learning.

We learn every single day. Learning something new helps humans evolve in some form or shape whether we recognise the growth or not at the time.

Irrespective of how old we are, we continue to learn through interactions with others, and within our environments.

While learning, we must always consider the needs of our mental, emotional, and physical health, as being paramount to excellence in education. It is key to becoming well positioned learners in this global world.

While many believe we have now entered post-Covid period, however evidence suggest we are continuously being impacted by the pandemic which unfortunately

This has made a huge impact on children's learning and how they learn. According to parents, whether their child is catching up on missed classes or getting through the content material, students are continuously feeling unsettled.

Support, guidance, and mentorship alongside MasterClass, Global Classroom and a forum for intellectual dialogue will cultivate learner growth. Scholarly Hub is a unique learning tool.

Do not miss out on the opportunity of cultivating inner and outer growth for learners. Welcome to Scholarly Hub.

Urgent: OECD report highlights drop in Literacy levels

Gap in education will only get larger.

“Even the most efficient attempts to push a central curriculum into classroom practice will drag out over a decade, because it takes so much time to communicate the goals and methods through the different layers of the system. In this age of accelerations, such a slow process inevitably leads to a widening gap between what students need to learn and what teachers teach. When fast gets really fast, being slow to adapt makes us really slow” (OECD Report, 2018).

continues to impact our children's
education, health and wellbein.
